IMPORTANCE OF BEVs

is driven by several factors

- Climate Action
- Sustainability
- Future Readiness
- Government Incentives
- Industry Transformation
- Circular Economy

Project Isle of Wight “Electric Island”

Significantly increase its **EV Charging Infrastructure**
Local Government has worked to
encourage EV use among residents and Businesses

Project Bristol EV Fleet

Transitioning its own **fleet which includes Cars, Vans and Buses**
Implementing measures to reduce ownership and encourage shared, Electric options which allow
individuals to RENT

How is Milton Keynes doing?

**VWFS Rent-a-car
Offers**

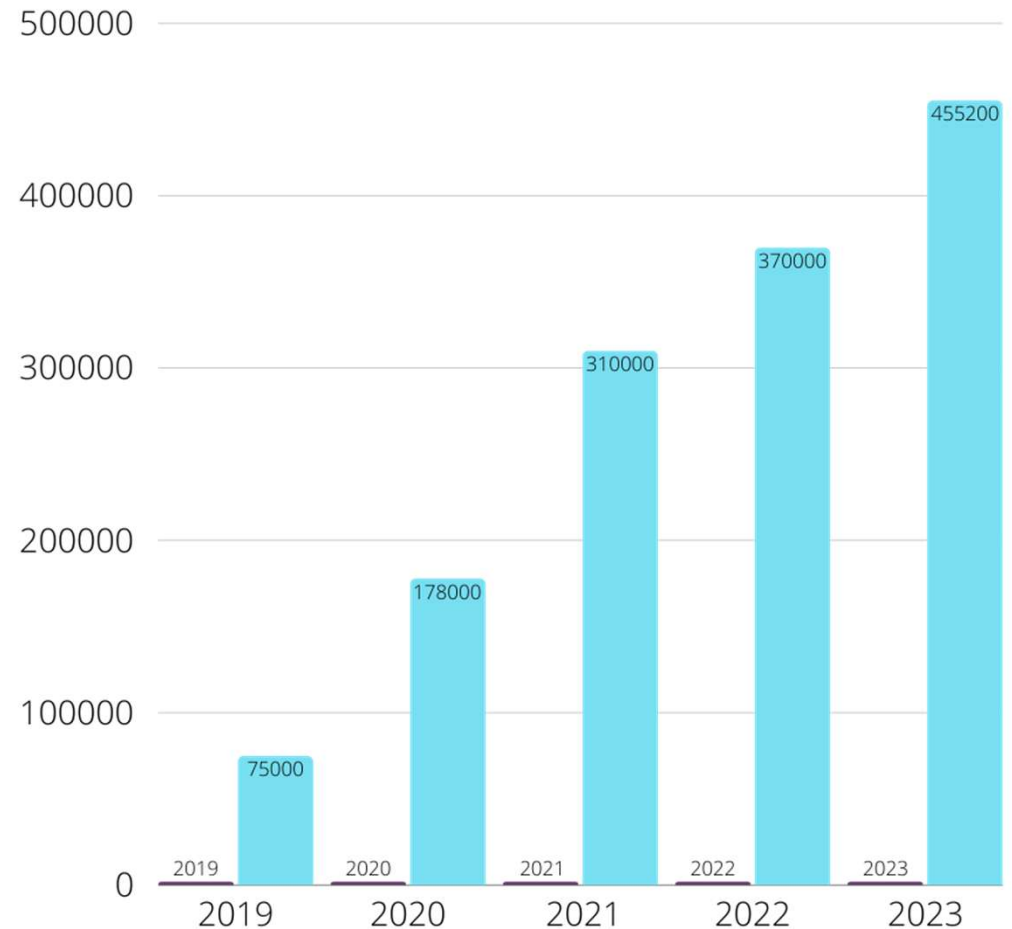

**Free Parking for
Low emission
Vehicles**

STATISTICS

Sales grew rapidly from **178,000 units** in 2020 to **450,000** by 2023, driven by advancements in technology, better infrastructure and supportive government policies.

“I currently operate a fleet consisting of **Seven vehicles, all of which are non-electric**. I have been engaged in this business since 2017, initially starting with my personal vehicle and gradually expanding my operations. I continue to favour internal combustion engine vehicles for my fleet instead of transitioning to electric vehicles. As a sole trader, I bear full responsibility for both the **initial and ongoing maintenance costs** associated with the business. I consistently **strive to minimize my expenses**, which leads me to consider the purchase of electric vehicles, although their **upfront costs are significantly higher**. Additionally, further consideration is the preference of my drivers and, at times, my customers, who often favour non-electric cars for **longer journeys due to concerns regarding range anxiety**.”

Leverage Government Incentives

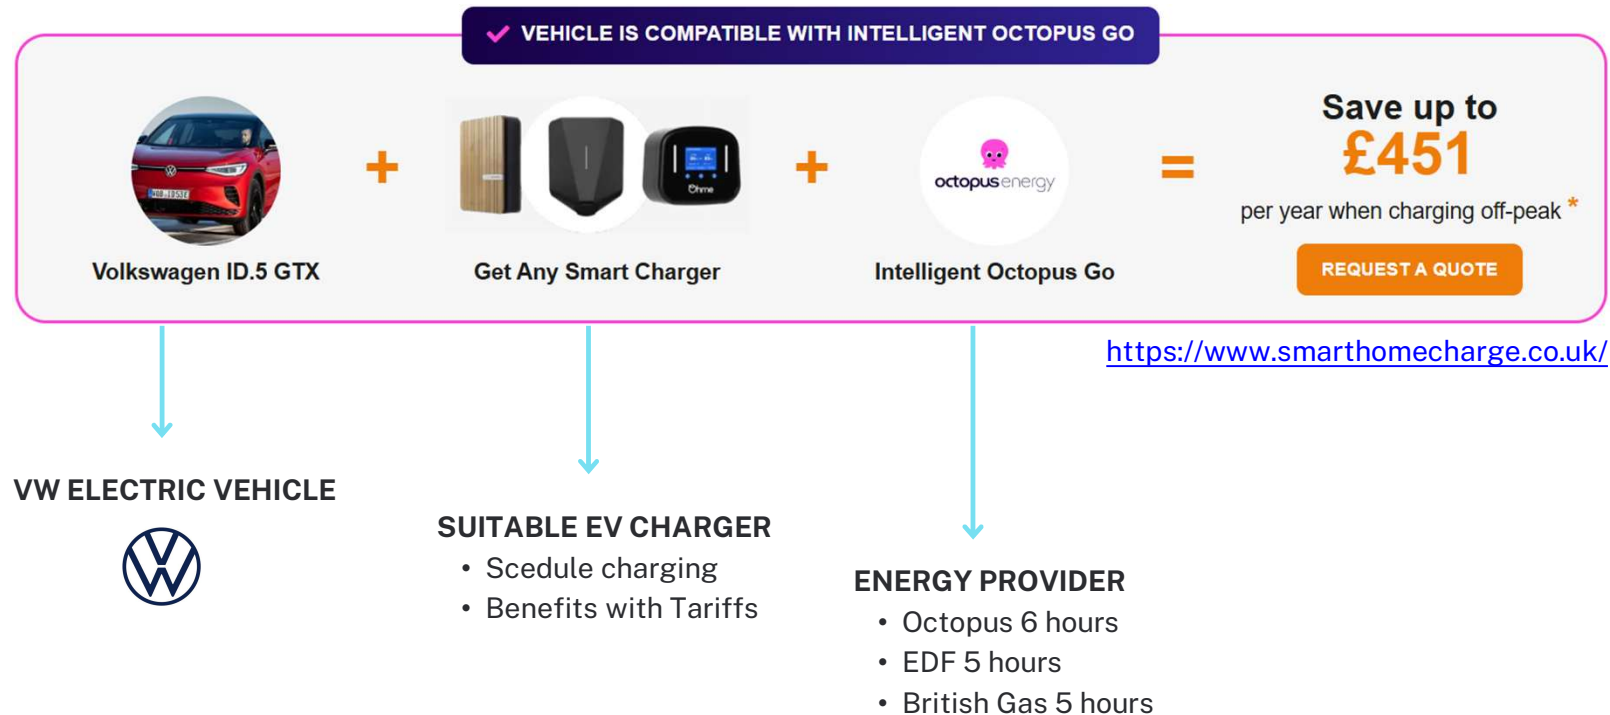

Seek help from **policy-makers** to establish benefits like **low benefit-in-kind tax rates**

Government **generosity was in decline** at the start of 2016 as the available discounts began to be drastically reduced.

Used Electric Vehicle Loan

Used EVs are 8.5% cheaper than gasoline cars at **Three years old**
First Generation models can be found for **under £10,000**
Platforms offer leasing **without LARGE initial** rental payments.

Total number of listed Solar Panel Installation companies are 1,912 and the industry is growing rapidly!

NOT JUST BUSINESSES BUT THE LOCAL COUNCIL WILL HELP AS WELL

Remove the hackney carriage limit and only allow new hackney carriage licenses for vehicles that are electrically powered (zero emissions/no exhaust).

- No longer grant new vehicle licenses (hackney carriage & private hire) for petrol/diesel/hybrid vehicles from 1 April 2030.
- No longer renew petrol, diesel and hybrid vehicle licenses (hackney carriage and private hire) for new vehicles (submitted by existing licence holders) and vehicles older than 10 years from 1 April 2030.
- The Council's vehicle age limit for electric/hydrogen vehicles (zero emissions/no exhaust) to be 15 years.

New vehicle applicants seeking to licence electric/hydrogen vehicles (zero emissions/no exhaust) to be given 5 years free licensing from 2025 to 2026.

Existing licence holders with electric/hydrogen vehicles (zero emissions/no exhaust) to be given 3 years free licensing from 2025 to 2026

CONCLUSION

By addressing the challenges of charging infrastructure, customer education and fleet investment, rental companies can play a key role in accelerating the adoption of Battery Electric vehicles and contribute to a more sustainable future. I believe that with the right strategies in place, we can create a win-win situation for both businesses and consumers
